

Technical Data Sheet

Multi-Lube Xtreme

A superior synthetic, multi-purpose, extremely versatile oil fortified with PTFE for use in industrial, Offshore, Construction & Mining applications

Multi-Lube Xtreme is a premium quality extremely versatile lubricant fortified with a stable suspension of PTFE (commonly known as Teflon) to give superior friction reduction and load carrying characteristics. It is designed to penetrate chains, wire ropes, threads, internal components etc.

Multi-lube Xtreme has anti-corrosion and anti-oxidation additives and a carrier fluid, which, when evaporated, leaves behind a durable lubricating film that protects against corrosion and reduces wear and friction. This non-stick PTFE based film repels water, dust and other contaminants.

Applications: -

Suitable for all types of chains, bearings, sliding surfaces, open lubrication points on equipment & machinery including those under high loads.

Prevents internal corrosion on chains, wire ropes etc, resists water wash off and protects against contaminants, dust, dirt etc.

As a general maintenance product it cleans, protects, displaces water, and lubricates all surfaces and components.

Features and Benefits: -

- Fully Synthetic base oil, extends wet life of lubricant
- Excellent penetrating properties frees-up corroded nuts, bolts and threads
- Contains PTFE for unrivalled wear resistance
- Truly multifunctional can replace many workshop products
- Excellent thin film coating protects against fretting corrosion, wear and squeaks
- Removes moisture and water prevents components from corroding
- Wide temperature range -40°C to +170°C

Method of Application: -

Multi-lube Xtreme can be applied by brush or dipped or in a suitable trigger spray. For penetrating threaded components and springs, allow time to penetrate. For best results, clean surface and remove old oil, dirt and grease, apply **Multi-lube Xtreme** sparingly.

Part Number: BL-21004
